Commercial Projects that generate grease/oil are required to have an approval for pretreatment by the Water and Sewer Department. Food Service establishments, Truck/Car washes, Churches, Hospitals, Schools, Hotels, Motels and Grocery stores, Automotive industry are some of the categories that require a pretreatment system.

Plan Review fee of $200.00 payable to Water and Sewer Dept./Commercial Pretreatment (Fee required once project has been approved)

1. Sizing based on the City of East Point commercial facilities generator source chart.

2. Site utility drawing showing location of grease/oil interceptor, tie-in to sanitary sewer and a note stating "CONSTRUCT PER FULTON COUNTY STANDARDS 701,702 &111." All grease or oil/water interceptors should be shown closet to the discharge point of grease/oil waste from the facility. The maximum distance of an interceptor from a discharge source will be no more than 50 feet. The location of the grease/oil interceptor must be accessible for maintenance and inspection.

3. Fulton County Standard Detail (701, 702 & 111) to be shown on detail site plans. If multiple grease or oil/water interceptors are required for a facility, they must be shown on the site utility plan in tandem. The test manhole is part of the pretreatment system and should be constructed accordingly as shown on the standard detail 701, 702, & 111. A concrete prefab manhole is acceptable as long as it is sized according to FC standard 111. The test manhole must have an invert in the bottom of the manhole.

4. No dumpster, trash compactor, or other utility structure lines can discharge through the grease & oil/water interceptor/test manhole. No sanitary waste lines can discharge through the grease & oil/water interceptor. The test manhole is part of the grease & oil/water interceptor system and is not to be used as a structure for the main sanitary sewer line.

5. Maintenance letter for scheduled pumping of pretreatment systems, should be submitted once plans have been approved. The maintenance letter must be notarized and signed by the company, contractor/developer or individual responsible for daily facility operations. (See sample letter).

6. Construction drawings required for review; cover sheet, site utility plan and detail sheet showing the required details for the pretreatment system used.

7. Statements for construction documents:
   a) If a commercial site will not have any food service, restaurant, or car/maintenance facilities planned, a note on the site utility sheet will be sufficient stating the following:

   "No commercial facilities are designed for this site that will require pretreatment systems such as Grease & Oil/Water interceptor(s) or Sand/Grit trap(s)."

8. Commercial carwash:
   Sizing based on the City of East Point commercial facilities generator source chart. Indicate whether a reclaim system will be used in conjunction with the oil/water interceptor & sand/grit trap. Must submit a Material Safety Data (MSD) list for all soap wash products, manufacterer data on wash system/flow balance to indicate % recycle or backwash to sanitary sewer.

   Apartment complexes:
   Are required to post signs in the carwash area stating "No car maintenance prohibited". Apartment complexes may be required to install an oil/water interceptor if more than (1) carwash bay will be built in a designated area.

Construciton Checklist (Exterior)

This list is for you to review to ensure that you have all the required items in place for the Preliminary/Final inspection. No fee is assessed for the preliminary inspection. Contractor is required to contact the FOG Program Coordinator within 24 hours for a Preliminary inspection at (404) 270-7117. If the inspection cannot be obtained in 24 hours, the inspector will determine the inspection date based on the contractors site conditions. No re-inspection date shall extend beyond (30) days without documentation submitted by the contractor and approved by the inspector.

Name of Facility: __________________________ Location: __________________________

Site Contact: __________________________ Telephone: __________________________

Type of system: __________________________

Preliminary Inspection

___ Plans stamped and signed by East Point.

___ NO BACKFILLING OF TANKS, CRUSH AND RUN MUST BE VISIBLE FOR INSPECTION.

___ Location(s) of the pretreatment system must be the same as the stamped as the stamped plans;
   Number of tank(s) and size.

___ Piping from the building uncovered to show separate waste lines; sanitary waste and kitchen waste line.

___ 6” PVC Tee’s put in grease/oil separator as required; Pipes sealed and grouted required.

___ Invoice of tank to verify size installed and crush and run.

___ No other waste lines discharge to test manhole designed for grease/oil separator. 1 ft drop invert in test
   manhole (refer to FC STD 701, 702, 111 & 113 details)

Final Inspection

___ Corrective action completed based on preliminary inspection.
   (Failure to complete will result in additional $50.00 inspection fee)

___ Notarized Maintenance letter for cleaning grease trap(s).

___ Building permit card posted for sign-off.

___ Inspection fee at final inspection - $150.00 (Single ownership)

___ Inspection fee for shopping centers or multiple ownership sites is $150.00 per tenant

OFFICE USE ONLY

PERMIT FEE: $  
DATE:  

The permit fee is determined by the type and number of pretreatment system(s) the generator has on site as stated in the City records. City records are updated annually. If a commercial waste generator disagrees with their permit fee assessment, they can request a site inspection by the City for a fee of $50.00. The fee **WILL NOT** be deducted from the annual permit cost. **Permit fees are due by March 31 of each year, with a 25% penalty occurring after March 31.**

Dear Melissa Echevarria,

This letter is to serve as our guarantee that the pretreatment system (oil/grease interceptor) required for this location will be pumped of all liquids and/or solids every 3 months per the City of East Point Commercial Wastewater Pretreatment Ordinance. An approved contractor of this nature who is permitted in the State of Georgia to remove non-hazardous liquid waste will perform this work. Every time our pretreatment system is pumped a completed copy of the manifest will remain at our facility.

Thank you for your assistance and cooperation on this project. If you have question, please do not hesitate to call me. I can be reached at ________________________.

Sincerely,

______________________________
